2023 RECAP

2023 was again a successful year for BRUNNER in many respects. From the development of the NOVASIM MR F-35 to the launch of the new online shop and several product launches implemented by a wonderful team. We would like to thank all our partners, customers and last but not least our great team.

NOVASIM MR | F-35

The NOVASIM MR F-35. This unclassified full motion F-35 MR Simulator sets a new standard for professional Part Task and mission training. From air-to-air refueling, formation flying to cockpit familiarization and hypoxia training the NOVASIM MR F-35 Simulator offers various training scenarios.

To reach training perfection BRUNNER has resembled a proper F-35 replica cockpit, BRUNNER control loading devices and the Aechalon IG on the well known NOVASIM platform. In a Mixed Reality trainer, the authenticity of the replica cockpit is essential.

The NOVASIM MR F-35 Simulator boasts extensively tuned flight physics models and BRUNNER control loadings, creating a comprehensive package. Reach new heights in fighter Jet pilot training with the BRUNNER NOVASIM MR F-35.

CLS-P B737 SETUP

As an element of our Control Loading System portfolio, our dual seat CLS-P B737 Yoke/Control Column solution integrates perfectly into many new or existing FNPT and FTD cockpit environments. A compact and sophisticated product design provides Boeing 737 style controls and create training solutions which provide optimum training value. Additionally, the B737 components are all designed to simulate and represent various functions like autopilot and trim and allows for easy and fast installation and setup.

FLIGHT INSTRUMENT PRO

The BRUNNER Flight Instrument Pro is adaptable to a full range of instrument formats and functions. The flight instrument pro electronic display lets you keep the classic look of your panel while upgrading with modern, glass touchscreen display technology. A large amount of instruments are already integrated, updates or adding new instruments is simple. The installation is straightforward and communication works over stable ethernet protocol.

CLS-B RUDDER PEDALS

The BRUNNER CLS-B Active Force Feedback Rudder meets the highest demands in professional and semi-professional flight simulation. The integrated proportional Toe brakes allow as well realistic aircraft simulation. Our CLS-B Rudder provides excellent quality, high fidelity and unique durability. It is unmatched in its class. A sophisticated product design and a realistic simulation of flight effects like engine vibration, ground turbulence, real trim, autopilot and many more create training scenarios which provide optimal training value.

NEW BRUNNER SHOP IS ONLINE!

NEW SHOP!

In July we were able to launch our new online shop, which provides simplified access to BRUNNER products for both private user and professional customers. We have also integrated more currencies (USD & CHF), more payment methods, product categories and simpler ordering processes.

BRUNNER GOES GREENER

As the environment is very important to us, we are committed to using our resources sparingly and sensibly every day. A big step in this direction is the extended PV system that has been installed on the BRUNNER company building.

The BRUNNER PV has a remarkable capacity, generating a substantial amount of electricity to power the various industrial operations within the building. By embracing renewable energy, BRUNNER sets an example for sustainability and showcases the potential for businesses to operate responsibly and environmentally. So far this year, more than 2/3 of the total energy that BRUNNER requires to operate has been obtained from solar energy.

On a sunny day the BRUNNER PV produces up to 260kWh a day.

SOCIAL MEDIA

Time is running - and so is technology! That's why BRUNNER 2023 has decided to start an Instagram channel as well. Follow us for more exciting news!

Highlights 2024

ITEC London:
09.-11. Apr 2024

I/ITSEC Orlando:
02.-06. Dec 2024

BRUNNER INSIDE

BRUNNER doesn't just travel for business - we took a trip to Italian-speaking Switzerland with the whole team, where we took in the beautiful scenery, enjoyed a delicious meal and of course some drinks!

As a BRUNNER family, we always spend the end of the year with a cozy, classic Swiss dinner such as Fondue or Raclette, which involves a lot of cheese and chocolate.

OUTLOOK 2024

We also have many exciting projects planned for 2024. On one hand, we will be launching the new, updated CLS-E MK II Joystick as well as different versions of CLS-P Collective levers. On the other hand, we will be taking the new NOVASIM MR F-35 to various exhibitions and are looking forward to other new & interesting challenges of this year.
